### SECTION 19: FEMALE EMPOWERMENT

**Interviewer flag:** According to the preferences listed below, ask the following questions to a married woman (whose spouse is still alive) listed in the household roster who is between the ages of 18 and 55 and has lived in this household for at least 6 months of the past year:

- 1st preference: Mother of youngest child, with husband staying in the same household
- 2nd preference: Youngest married woman, with husband staying in the same household
- 3rd preference: Other married woman, with husband staying in the same household
- 4th preference: Other married woman in the household

Generally, you should interview a woman whose spouse is alive and listed in the household roster. Only if no such woman is available for any preference, you may interview a woman whose husband is alive but not listed in the roster (for instance, living outside household or separated/divorced), and who otherwise meets our criteria.

**Interviewer read:** We are working for the Institute for Financial Management & Research (IFMR) and Harvard University doing a research survey. The purpose of this study is to understand the socioeconomic conditions of your household. You would like to ask you questions about your relationships with others, your family, and your general health and wellbeing. In addition, we would like to ask you questions about your children’s welfare and health. Your participation in this survey will take between 20 and 50 minutes.

Your identity will be protected by the research team and will not be shared with any person or organization apart from the research team. Your participation in this survey is voluntary, and you may withdraw your information freely after participating. You may decline to answer any question.

Your data will be kept completely confidential. Once the research is completed, the paper documents and any personally identifiable information will be destroyed. An electronic version of the data will be stored at Harvard Kennedy School, without any personally identifiable information. These data may be made available to other researchers, again without any personally identifiable information.

In 2 years, we will come back to you and the children to conduct the follow up survey and will be asking all of you very similar questions to the ones we will ask you today. This study in 2 years time is also voluntary. Should you have questions about the survey, please let the surveyor or his supervisor know, and you will be put in touch with the research team.

Your participation in this survey is voluntary, and you may withdraw your information freely after participating. You may decline to answer any question.

Your identity will be protected by the research team and will not be shared with any person or organization apart from the research team. Please inform us if you do not wish to participate in this section of the survey. Your responses will be kept confidential.

Do you wish to participate in this section of the survey?

If no suitable lower preference respondent is found, go to end of survey, 19.99.

If no suitable lower preference respondent is found, go to end of section, 19.99.
